To: Hiring Manager / IT Talent Acquisition Team

Re: Application for IT Support Engineer / Desktop Support / Network Support Position (UAE)

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the IT Support Engineer / Network Support position within your organization in the UAE. As a Cisco Certified Network Associate (CCNA #CSCO15240575) with over 4 years of hands-on experience in desktop support, basic Active Directory user management, hardware diagnostics, LAN connectivity, and PowerShell automation, I am prepared to deliver immediate operational value to your IT team.

Throughout my 4-year career at Grand Infotech—progressing through merit-based promotions from Junior IT Support Technician to Senior Specialist and IT Support Lead & Service Coordinator—I have consistently maintained high first-contact resolution rates and successfully managed 30+ weekly hardware and network tickets. My background combines deep component-level hardware troubleshooting and Windows 10/11 administration with Active Directory user management, network multifunction printer maintenance, and structured Cat6 cabling.

(Authentic photographic evidence of my on-site cabling, 10-PC corporate deployments, and official Cisco CCNA credentials can be inspected live on my portfolio: <https://athulkrishna-it.netlify.app>)

- **Corporate Workstation Deployments & Active Directory:** Assembling, staging, and deploying 10-PC workstation environments in a single weekend with zero operational downtime; configuring Windows 11 Enterprise, Active Directory domain joins, SMB share permissions, and network printer fleets.
- **Cisco CCNA Networking & Structured Cabling:** Configuring managed Cisco switches, routers, VLAN segmentation, Wi-Fi access points, and Cat6 cabling runs adhering to T568B standards with 100% cable continuity pass rates.
- **PowerShell Process Automation:** Authoring automated deployment script suites utilizing WinGet CLI to configure standardized software baselines silently, reducing per-machine setup time by ~82% (from 45 minutes to under 8 minutes).
- **Physical Security & Service Desk Operations:** Assisting in the installation of 16-channel IP camera systems with PoE switching and managing service desk workflows using Dev Soft ticketing with automated WhatsApp status notifications.

I am currently based in Baniyas West, Abu Dhabi on a Visit Visa with verified original credentials, and I am available for **immediate in-person interviews and onboarding on 0 days notice**, fully prepared for immediate in-country employment visa issuance across Abu Dhabi, Dubai, or anywhere in the UAE. I welcome the opportunity to discuss how my technical skills, proactive work ethic, and dedication to high-availability IT services can support your organization's goals.

Thank you for your time and consideration.

Sincerely,

Athul Krishna O S

CCNA Certified IT Support & Network Engineer (#CSCO15240575)
